

How a leading gym player identified more than 90% of their churners using Data Science

Solinca is one of the biggest gym chains in Portugal, operating around 20 Health & Fitness Clubs, with almost 20 years of experience. The company needed an effective way to minimize service subscription drop-outs (churn rate), while developing their retention strategy.

The solution was Churn Analytics, our Data Science solution that returns a list of potential churners, enabling you to proactively develop churn mitigation strategies.

seeplus | **CHURN ANALYTICS**

Reduce customer churn rate

With Churn Analytics, Retailers are able to:

- ✓ Identify churn patterns & quantify their impacts
- ✓ Recognize potential churners & their customer value
- ✓ Develop and monitor proactive churn mitigation strategies
- ✓ Reduce customer churn rate
- ✓ Signal high risk potential churners for retention actions
- ✓ Identify potential churners up to 3 months in advance of actual churning

WHAT WE ACHIEVED

Reduced churn rate by up to **10%**

Avoided a loss of revenue ranging from **7%** to **12%**

More than **90%** of identified churners

About us

We are a retail innovation company on a mission to democratise data intelligence. We provide data science solutions and digital tools that deliver quantifiable insights and actionable recommendations with direct and sustainable impact on key metrics.
